

How can the power generating industry get moving with the energy transition?

And what are some of the key stakeholders doing to support this evolution?

Attend our panel discussion at MEE 2024 to get answers!

The energy transition remains a hot topic in the power generating industry. What are the real challenges and solutions, how can we get moving, what is the outlook for the distributed energy market in 5 years' time ... and what will all of this mean to you and your business?

On 17 April, we are hosting a panel debate during MEE 2024 focusing on these questions – and you are invited to attend. We are presenting the event in cooperation with Aggreko, Atlas Copco (Power & Energy), and EODEV.

Panel list

You will meet the following experts at the panel discussion:

- Rodrigo Hartstein Salim, Ph.D, Head of Product Line – Battery and Energy Storage, Aggreko
- Julio Tome, Global Business Development Manager, Atlas Copco
- Stéphane Jardin, Chief Commercial Officer / Thibault Tallieu, Chief Marketing Officer, EODEV
- Jacob Danielsen, Product Manager for Hybrid & Microgrid, DEIF

Senior Vice President Suresh Badri Narayanan of DEIF will be moderating the debate.

Practical details

Event title: Energy transition to reduce CO2 emissions from energy production and control global warming

Time and place: 17 April 2024, 11:00-12:00, Ajman A conference room, Dubai World Trade Center

We are confident that the panel discussion will provide insights into the present state and future direction of the power generating industry, and we hope to see you at the event. Click the link below to register on [deif.com](https://www.deif.com)!
